

## Guide: How to Create a Custom Logo and Navigation Menu

1 Step 1: Start with a single Section, Column and Row. I added the text "Logo Here" to my column and later we will add the actual logo here.

2 Step 2: Click the Hamburger Toggle inside of the Blue Column Control Then Click "Clone" twice to add Three Identical Columns.

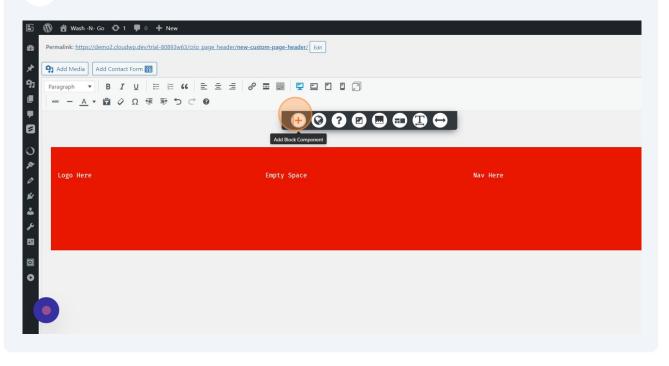

**3** Step 3: I renamed each section to make placing our elements a little easier.

谷 Wash -N-Go ◆ 1 単 0 + New			Howdy, y

**5** Your Elements Should Expand To The Full Width Of Your Page.

6 Step 5: Add Your Site Logo and Nav To The Columns and Remove Your Placeholder Text
